EDUCATION

Federal University of Agriculture, Abeokuta

Bachelor of Engineering in Mechatronics Engineering

Abeokuta, Ogun

Apr. 2018 – Jan. 2025

Comprehensive Academy Lafenwa

Secondary Education

Abeokuta

Aug. 2014 – May 2018

EXPERIENCE

STEM Tutor

Braniacs STEM and Robotics

2023 – 2024

Ikoyi, Lagos

- Conducted hands-on STEM workshops to engage students in robotics and engineering principles.
- Provided tailored guidance to improve students' problem-solving and critical thinking skills in STEM subjects.
- Provided instruction in coding and robotics, fostering technical skills in young learners.

Front-End Developer

CODSOFT

2022 – 2023

Kolkata, India

- Designed and implemented responsive user interfaces using HTML, CSS, and JavaScript.
- Collaborated with back-end developers to integrate APIs and ensure seamless functionality.
- Optimized web applications for maximum speed and scalability.

Tech Tutor

Braniacs STEM and Robotics

Aug. 2024 – Nov. 2024

Ikoyi, Lagos

- Provided instruction in coding and robotics, fostering technical skills in young learners.
- Developed customized lesson plans to meet diverse student needs in technology-focused subjects.
- Actively participated in robotics projects, including robotic arms and obstacle avoidance robots.
- Gained experience in building user interfaces for web development projects.
- Collaborated effectively with team members to brainstorm ideas, troubleshoot problems, and deliver projects on time.

Tech Tutor (Software & STEM)

GrandSchule School Kids

2024 – Present

Lagos, Nigeria

- Teach students programming and technology skills, covering Scratch, JavaScript, HTML, CSS, Python, and web/game development.
- Incorporate STEM concepts into lessons to strengthen students' math and science understanding alongside coding.
- Guided students to build personal websites, interactive games in Scratch, and develop foundational Python problem-solving skills.
- Designed engaging, project-based lessons that improved students' creativity, critical thinking, and confidence in technology.
- Contributed to student enrollment growth through effective teaching methods and positive feedback from parents and learners.

Front-End Developer

5Star Company

Mar. 2025 – Present

Lagos, Nigeria

- Built the front-end of the **Spring Check** platform, implementing interfaces for BVN verification, voter verification, driver's license verification, and other identity verification services.
- Integrated a secure payment system into the platform, enabling seamless transactions for users accessing verification services.
- Collaborated with back-end developers to consume REST APIs and ensure smooth interaction between the front-end and the Spring Check verification system.
- Optimized the user interface for responsiveness and performance, ensuring accessibility across devices.
- Currently developing the front-end of a **video conferencing application** designed to compete with Zoom, focusing on real-time communication features and a user-friendly interface.

PROJECTS

Anon <i>HTML, CSS, React, JavaScript</i>	Nov. 2024 – Present
• Developed an ecommerce web application using React as the frontend. • Implemented features such as product catalog, shopping cart, secure checkout, and user authentication. • Optimized the application for performance and SEO, ensuring a seamless user experience. • Utilized state management techniques like Redux or Context API to manage complex application state.	
Casino Bot (Telegram Mini-App) <i>Telegram Bot API, JavaScript, Git</i>	Oct. 2024 – Nov. 2024
• Implemented a variety of casino games, including slots, blackjack, and roulette. • Integrated with the Telegram Bot API to enable seamless interaction and real-time updates. • Employed Git for version control and collaboration with team members.	
Spring Check <i>React.js, TailwindCSS, PHP, APIs</i>	Mar. 2025 – Present
• Developed the front-end of a high-performance verification platform supporting BVN, voter, driver's license, and other identity verification services. • Implemented secure payment features enabling users to fund accounts, make payments, and access verification services. • Built interactive and responsive data visualizations, including dynamic graphs and real-time API logs. • Designed intuitive search and filtering logic to streamline user navigation and data retrieval. • Integrated detailed API documentation to guide developers in leveraging the Spring Check platform's services.	
AI Applicant Tracking System (AI ATS) <i>React.js, React Router, Puter.js, TailwindCSS, Vite</i>	Sept. 2025
• Developed a web application that analyzes resumes against job descriptions using AI to provide ATS (Applicant Tracking System) scores and detailed improvement suggestions. • Implemented features for user authentication, resume/job description uploads, and feedback storage in a database for future reference. • Designed interactive dashboards for users to track multiple job applications and retrieve historical feedback. • Integrated AI-driven analysis to highlight keyword matching, skill gaps, and actionable steps for improving job application success rates. • Optimized the front-end for responsiveness and performance with Vite, React Router, and TailwindCSS.	

TECHNICAL SKILLS

Languages: JavaScript, HTML/CSS, Python, PHP, SQL, Solidity
Frameworks & Libraries: React.js, React Router, Next.js, React Native, Node.js, Express, TailwindCSS, ShadCN/UI, WordPress, Webflow, Bubble, Drizzle ORM
Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, MS Excel
APIs & Services: BetterAuth, Bunny (video storage), Hugging Face (AI models)
No-Code Platforms: Lovable, Bold.new, Reply, Bubble, Webflow
Data & Visualization: NumPy, Matplotlib, Chart.js
