EDUCATION

Federal University of Agriculture, Abeokuta

Bachelor of Engineering in Mechatronics Engineering

Abeokuta, Ogun

Apr. 2018 – Jan. 2025

Comprehensive Academy Lafenwa

Secondary Education

Abeokuta

Aug. 2014 – May 2018

EXPERIENCE

STEM Tutor

Braniacs STEM and Robotics

2023 – 2024

Ikoyi, Lagos

- Conducted hands-on STEM workshops to engage students in robotics and engineering principles.
- Provided tailored guidance to improve students' problem-solving and critical thinking skills in STEM subjects.
- Provided instruction in coding and robotics, fostering technical skills in young learners.

Front-End Developer

CODSOFT

2022 – 2023

Kolkata, India

- Designed and implemented responsive user interfaces using HTML, CSS, and JavaScript.
- Collaborated with back-end developers to integrate APIs and ensure seamless functionality.
- Optimized web applications for maximum speed and scalability.

Tech Tutor

Braniacs STEM and Robotics

Aug. 2024 – Nov. 2024

Ikoyi, Lagos

- Provided instruction in coding and robotics, fostering technical skills in young learners.
- Developed customized lesson plans to meet diverse student needs in technology-focused subjects.
- Actively participated in robotics projects, including robotic arms and obstacle avoidance robots.
- Gained experience in building user interfaces for web development projects.
- Collaborated effectively with team members to brainstorm ideas, troubleshoot problems, and deliver projects on time.

Tech Tutor (Software & STEM)

GrandSchule School Kids

2024 – Jan. 2026

Lagos, Nigeria

- Teach students programming and technology skills, covering Scratch, JavaScript, HTML, CSS, Python, and web/game development.
- Incorporate STEM concepts into lessons to strengthen students' math and science understanding alongside coding.
- Guided students to build personal websites, interactive games in Scratch, and develop foundational Python problem-solving skills.
- Designed engaging, project-based lessons that improved students' creativity, critical thinking, and confidence in technology.
- Contributed to student enrollment growth through effective teaching methods and positive feedback from parents and learners.

Front-End Developer

5Star Company

Mar. 2025 – Present

Lagos, Nigeria

- Built the front-end of the **SprintCheck** platform, implementing interfaces for BVN verification, voter verification, driver's license verification, and other identity verification services.
- Integrated a secure payment system into the platform, enabling seamless transactions for users accessing verification services.
- Collaborated with back-end developers to consume REST APIs and ensure smooth interaction between the front-end and the Spring Check verification system.
- Optimized the user interface for responsiveness and performance, ensuring accessibility across devices.
- Currently developing the front-end of a **video conferencing application** designed to compete with Zoom, focusing on real-time communication features and a user-friendly interface.

Front-End Developer

Jan. 2025 – Present

Adaptive Future Technologies

Lagos, Nigeria

- Architected and built **OYSAA** (oysaa-ng.com), a government PWA for the Oyo State Signage and Advertisement Agency — delivering six role-specific portals (Public, Practitioner, Business Owner, Officer, First Party, Super Admin) with middleware-enforced JWT authentication and role-based access control.
- Implemented GIS-powered billboard mapping with Leaflet and React Leaflet for geolocation of ad sites across Oyo State; integrated QR code scanning for real-time field compliance and enforcement workflows.
- Built end-to-end advertisement lifecycle management including application workflows, demand notice generation with SME classification, practitioner licensing and renewals, and financial operations (wallet management, withdrawal processing, commission configuration).
- Developed **MedicFlow** (oyohmb.com), an enterprise Hospital Management System (HMS) to digitize healthcare operations across public hospitals in Oyo State — covering patient registration, Electronic Medical Records (EMR), and outpatient/inpatient care workflows.
- Built inter-departmental clinical modules within MedicFlow for Pharmacy, Laboratory, Radiology, Pathology, and Blood Bank, alongside automated Billing, Finance, and HR management modules with strict RBAC for sensitive medical data.

PROJECTS

OYSAA (Oyo State Signage and Advertisement Agency Platform) | *Next.js, TypeScript, TailwindCSS, Leaflet, JWT A*

- Architected and developed a government-grade Progressive Web App (PWA) with six role-based portals (Public, Practitioner, Business Owner, Officer, First Party, Super Admin).
- Implemented middleware-based JWT authentication and role-based access control (RBAC) for secure multi-user workflows.
- Built GIS-powered billboard mapping using Leaflet and React Leaflet for real-time geolocation tracking of advertisement sites.
- Developed full advertisement lifecycle features including application processing, licensing, renewals, and compliance enforcement.
- Integrated financial systems including wallet management, commission configuration, and withdrawal workflows.

MedicFlow (Hospital Management System)

2025 – Present

- Developed an enterprise Hospital Management System (HMS) to digitize healthcare operations across public hospitals.
- Implemented Electronic Medical Records (EMR), patient registration, and outpatient/inpatient workflows.
- Built modular systems for Pharmacy, Laboratory, Radiology, Pathology, and Blood Bank operations.
- Designed secure billing, finance, and HR modules with strict role-based access control for sensitive medical data.
- Enhanced efficiency in hospital operations through automation of administrative and clinical processes.

SprintCheck | *React.js, TailwindCSS, APIs*

Mar. 2025 – Present

- Developed the front-end of a high-performance verification platform supporting BVN, voter, driver's license, and other identity verification services.
- Implemented secure payment features enabling users to fund accounts, make payments, and access verification services.
- Built interactive and responsive data visualizations, including dynamic graphs and real-time API logs.
- Designed intuitive search and filtering logic to streamline user navigation and data retrieval.
- Integrated detailed API documentation to guide developers in leveraging the platform's services.

AI Applicant Tracking System (AI ATS) | *React.js, React Router, Puter.js, TailwindCSS, Vite*

Sept. 2025

- Developed a web application that analyzes resumes against job descriptions using AI to provide ATS scores and detailed improvement suggestions.
- Implemented features for user authentication, resume/job description uploads, and feedback storage for future reference.
- Designed interactive dashboards for tracking job applications and retrieving historical feedback.
- Integrated AI-driven analysis to highlight keyword matching, skill gaps, and actionable improvements.
- Optimized performance and responsiveness using Vite, React Router, and TailwindCSS.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS, Python, PHP, SQL, Solidity

Frameworks & Libraries: React.js, Next.js, React Native, Node.js, Express, Vite, TailwindCSS, ShadCN/UI, Material UI (MUI), Zustand, SWR, React Query, Recharts, Chart.js, CanvasJS, Leaflet, WordPress, Webflow, Drizzle ORM

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, MS Excel

APIs & Services: REST APIs, JWT (cookie-based auth), BetterAuth, Paystack, Flutterwave, Bunny (video storage), Hugging Face (AI models)

No-Code Platforms: Lovable, Bolt.new, Replit, Bubble, Webflow

Data & Visualization: NumPy, Matplotlib, Recharts, Chart.js, CanvasJS
